SUMMARY

Flutter Developer with **2+ years** of experience building scalable SaaS products across mobile and web. Specialized in Clean Architecture, BLoC state management, and modular system design for high-performance, maintainable applications.

EDUCATION

Bachelor of **Computer Science**, Zagazig University, Faculty of Computers and Information

2019 - 2023

Graduation Project: Excellent (A)

PROFESSIONAL EXPERIENCE

BARQ SOLUTIONS, *Flutter Developer*

2024 - Present
Kuwait | Remote

- Built and maintained a scalable multi-vertical SaaS platform (booking, ordering, and management systems) across **mobile** and **web**.
- Designed and maintained Clean Architecture with **BLoC** for scalable and modular codebases.
- Built real-time synchronization using Pusher **WebSockets**, improving system responsiveness.
- Developed a dynamic remote configuration system for UI and feature control without app releases.
- Integrated secure services including **maps**, **payment gateways**, and push **notifications**.
- Delivered offline-first capabilities with **local caching** for an uninterrupted user experience.

Hirsto, *Flutter Developer*

09/2025 - 01/2026
Dubai | Freelance

- Developed a comprehensive healthcare ecosystem featuring **AI-powered streaming chat**, health metric tracking, and medical report generation.
- Integrated **Zego** for Video/Voice calls and **ElevenLabs (TTS/STT)** for voice-based interactions.

DUBISIGN, *Flutter Developer Intern*

11/2023 - 02/2024
Mansoura | On-site

- Translated Figma designs into responsive **Flutter Web** UI for a document management **dashboard**.
- Integrated REST APIs using Dio to handle data flow and improve backend communication.
- Built reusable UI components to ensure consistency and scalability across the dashboard.
- **Optimized performance** by improving rendering efficiency and reducing unnecessary API calls.

PROJECTS

Shalehi App, (Mobile & Web)

[Google Play](#) [App Store](#) [Web App](#)

- Built a **chalet rental and booking platform** with smooth search, booking, and payment flows.
- Integrated **REST APIs, Firebase services, KNET payment gateway, and push notifications.**
- Implemented **deep linking** and real-time booking management to enhance user engagement and navigation.

Customer App, (Mobile & Web)

- Developed a full-featured customer application supporting **booking, ordering, and payments.**
- Integrated **REST APIs, Firebase services, Google Maps, and KNET payment gateway.**
- Implemented **deep linking** and **push notifications.**

Hirsto Healthcare App

- Developed a scalable medical ecosystem using **Clean Arch** and **BLoC** for modular state management.
- Integrated **AI-powered streaming chat** and **ElevenLabs (TTS/STT)** for voice-driven health assistants.
- Implemented real-time video/voice consultations via **Zego** and managed health metrics/vitals tracking.
- Built a multi-user family account system with secure medical record sharing using **REST APIs** and **GoRouter.**

Orders App, (Mobile & Web)

- Built a real-time order management system for vendors supporting **bookings** and **reservations.**
- Implemented live updates using **WebSockets** and **push notifications.**
- Enabled order lifecycle management with REST APIs for creating, updating, and tracking reservations.

Tablet Catalog App

- Developed a multi-business tablet catalog application for **offline browsing** of categories, item details, and media galleries.
- Architected an offline-first solution using Hive, enabling reliable functionality in **low/no-connectivity environments.**
- Implemented local caching and data persistence for fast data access and a seamless user experience.

SKILLS

Mobile Development

Flutter, Dart, Clean Architecture, MVVM, BLoC/Cubit, GoRouter, SOLID, OOP, Design Patterns

Backend & Integration

REST APIs, Dio, WebSockets, Firebase, Supabase, Google Maps, OneSignal, Payment Gateways, ElevenLabs

State Management & Storage

Hive, SharedPreferences, FlutterSecureStorage

Testing, DevOps & Tools

Unit Testing, Widget Testing, Mockito, Git, GitHub Actions, Jenkins, Fastlane, Sentry, Postman, Jira

UI/UX & App Features

Responsive Design, Theming, Localization, Deep Linking, Figma

Computer Science & Problem Solving

Data Structures, Algorithms, Problem Solving
